

Week 1 Objective: Identify literature and develop Outline/Structure

Activity	Status	Literature	Who?
Develop literature review search strategy and inclusion criteria	English peer-reviewed articles published in the last 10 years. With at least 80% of the articles published in the last five years. Keep track of what all members are working on and share what relates to their specific areas of coverage.		Team
Search and collect academic articles, industry reports, and policy documents	Submit articles, reports, links, and other resources		Team
Search and review literature on fraud detection systems	• Rule-based fraud detection systems • Transaction monitoring systems • Risk-based authentication systems • Behavioural analytics and user profiling systems • Anomaly detection systems • Device fingerprinting and identity verification systems • Multi-factor authentication (MFA) fraud prevention systems • Machine learning-based fraud detection systems • Deep learning-based fraud detection systems • Hybrid fraud detection systems (rule-based and machine learning) • Ensemble machine learning fraud detection systems • Real-time transaction fraud detection systems • AI-driven adaptive fraud detection systems	AbouGrad and Sankuru (2025); Achary and Shelke (2023); Compagnino et al. (2025); Faisal et al. (2024); Hernandez Aros et al. (2024); Khatib (2024); Prabowo (2016); Vanini et al. (2023)	Sanni

	Federated and privacy-preserving fraud detection systems		
Search and review literature on traditional and legacy fraud detection systems	- Rule-based fraud detection systems - Expert systems - Signature- and pattern-matching systems - Threshold-based transaction monitoring systems - Statistical fraud detection systems - Manual fraud review and investigation systems - Risk scoring and risk-based authentication systems - Blacklist and whitelist-based detection systems - Device and IP address monitoring systems - Behaviour-based profiling systems - Velocity checking systems (transaction frequency and value monitoring) - Knowledge-based fraud detection systems	Achary and Shelke (2023); Hernandez Aros et al. (2024); Lim, Lee and Sim (2021); Prabowo (2016); Vanini et al. (2023)	Sanni
Search and review literature on machine learning-based fraud detection systems	- Supervised machine learning fraud detection systems - Unsupervised machine learning fraud detection systems - Semi-supervised machine learning fraud detection systems - Reinforcement learning-based fraud detection systems - Deep learning-based fraud detection systems - Ensemble learning-based fraud detection systems - Hybrid machine learning fraud detection systems - Anomaly detection-based machine learning systems - Behavioural analytics-based machine learning systems - Real-time machine learning fraud detection systems - Graph-based machine learning fraud detection systems	AbouGrad and Sankuru (2025); Al-dahasi et al. (2025); Chen (2025); Compagnino et al. (2025); Dichev, Zarkova and Angelov (2025); Hashemi, Mirtaheeri and Greco (2022); Islam et al. (2024); Khalid et al. (2024); Khatib (2024); Li	Sanni/Omatayo

	• Federated machine learning fraud detection systems • Explainable Artificial Intelligence (XAI)-based fraud detection systems • Adaptive and online learning fraud detection systems • Privacy-preserving machine learning fraud detection systems	and Chen (2025); Luong and Xie (2026); Zhang et al. (2023)
